CORE SKILLS

React, TS, JS, HTML, CSS, styled-components, GraphQL, react-router, redux, Cypress, webpack

WORK EXPERIENCE

June 2020 – present

PJSC Sberbank (Saint Petersburg)

Lead Development Engineer

Responsibilities:

- Development of React/TypeScript/GraphQL release orchestration tool for DevOps pipelines centralization. Application is used by 350 teams that develop more than 2 thousand applications. At the moment, the project is being migrated to ts and the transition from redux to the React Context API. E2e tests are written for general scenarios of business processes, stories are written for components in a storybook.
- Improved the functionality of the internal widget for collecting feedback for release. Refactoring of the codebase, fixed display bugs. At the moment, the widget is being actively integrated into the products of the "Technologies" block.

Achievements:

- Translated the application to the fifth version of react-router from the third: changes affected 250+ files, 15,000 lines of code, completely rewritten and transferred to TS routing, the application breadcrumb handler, as well as top-level wrappers. The main pages of the application have been rewritten into functional components.
- Developed a component of a new type of pipeline stage: a new stage is built into the pipeline, auxiliary functions are written for the operation of dependent modal windows and displaying additional information.

October 2019 – June 2020

Emphasoft (Saint Petersburg, emphasoft.com)

Junior full stack developer

Responsibilities:

- Developed React + Redux + Material UI application for corporate chat which allows the user to be a member of several departments of the company at the same time and it is more convenient to work with corporate bots.
- Developed an extension for a commercial React project for creating real estate transactions: improved form for creating an offer using redux-form and drag'n'drop support for photos.

EDUCATION

ITMO University

Saint Petersburg (September 2017 – June 2021)

BCs: Information Systems and Technologies

XAMK University

Mikkeli, Finland (January 2019 – May 2019)

Student exchange program

CERTIFICATES

CCNA Routing and Switching: Scaling Networks

CCNA Routing and Switching: Connecting Networks

Financing and Business planning (XAMK University)

ADDITIONAL INFO

English: C1 (Advanced).

I take part in meetups, was a speaker at an internal meetup on the front-end development of the Technologies block (coverage of 100+ people). I am conducting a team retrospective: I changed the retrospective format, the innovations received a positive assessment from colleagues, and also made it possible to highlight more action-items at the end of the meeting. Additionally, I'm also studying the current front-end development tools. I set a goal for myself to grow to the position of a team lead in 2 years.
